ABSTRACT
        This manual was produced during the 1992-93 Wilfrid
Laurier University in Ontario school year to be used as a reference
guide and a training tool for library support staff assigned to work
at the library's information desks. Its purpose is to help ensure a
uniform standard of service and to provide practical procedures for
information and basic reference service. It was compiled using ideas
from published reference manuals and staff training materials and
from direct observation of the support staff at the information desk.
The topics covered in this manual include (1) areas of
responsibility; (2) policies of job performance including basic
principles, ethical issues, desk duties, the reference interview,
answering questions, follow-ups, phone calls, and referrals; and (3)
reference tools found in the library, including the online catalog,
CD-ROMs, and quick reference tools. An index to the reference tools
is included. The reference situations and training questions in the
appendices were used in training the support staff but were not
included in the actual manual. (Contains 11 references.) (JLB)

MANUAL FOR SUPPORT STAFF

ON THE INFORMATION DESKS

REFERENCE DEPARTMENT

LIBRARY

WILFRID LAURIER UNIVERSITY

DEBORAH WILLS

1993

CONTENTS

INTRODUCTION

Wilfrid Laurier University, located in Waterloo, Ontario, has a population of approximately 5500 full-time and 2700 part-time undergraduates and 325 full-time and 235 part-time graduate students. Its library, a seven-floor structure, houses approximately 1.2 million volumes, including government documents and microforms. The third floor reference area, which includes indexes, abstracts and CD-ROMs as well as the reference stacks and "quick" reference shelves, has a staff of three full-time and two part-time librarians. The fourth floor, which houses serials and government documents, has one full-time librarian.

In the fall of 1992, the library began using support staff to relieve the workload of the professional librarians. Seven staff members volunteered to work in shifts at the third floor information desk from 9:00 to 4:30 Monday to Friday. They answered basic informational, directional, and reference questions. They were supported by assigned back-up librarians who joined them at the desk during busy periods. At the end of the school year, this use of support staff was judged successful, and in 1993, support staff were officially selected and assigned to information desk duty on the third and fourth floors.

The following manual was produced during the 1992-93 school year and has been used as a reference guide and a training tool. Its purpose is to help ensure a uniform standard of service and to provide practical procedures for information and basic reference service. It was compiled using ideas from published reference manuals and staff training materials and from direct observation of the support staff at the information desk. The "reference situations" and "training questions" in the appendices were not included in the manual, but were used during training.

1

AREAS OF RESPONSIBILITY (THIRD AND FOURTH FLOORS)

1)   To handle telephone and in-person questions on library locations, functions and policies.
Requires: a) familiarity with Library Handbook information
          b) familiarity with library policies and procedures
          c) ability to transfer phone messages
          d) ability to locate phone numbers for:
                - library departments
                - university departments
                - faculty and personnel
                - University of Waterloo (key numbers)

2)   To assist users with online catalogue (QCAT) and serials holdings tools.
Requires: a) QCAT knowledge:
                - basic typing ability
                - searching on each field
                - narrowing a search
                - familiarity with LC subject headings (red books)
                - identifying information in each field of a record
                - placing holds
                - searching University of Waterloo's catalogue
                - familiarity with information on help screens
          b) Serials knowledge:
                - using WLU Serials list to locate titles and issues
                  by call numbers and formats. (includes
                  understanding of symbols, such as double
                  slash for ceased serials)
                - identifying holdings for University of Waterloo
                  and other universities, using microfiche readers
          c) Basic knowledge of CODOC filing system

3)   To make appropriate referrals to assigned back-up librarian and other library departments.
Requires: a) ability to recognize "reference" questions and pass
             them on promptly
          b) knowledge of functions of other library departments

ADDITIONAL AREAS OF RESPONSIBILITY (THIRD FLOOR)

1)   To handle basic directional and reference questions dealing with third floor sources.
Requires: a) familiarity with contents of information desk drawer,
             including data file: Difficulty/Frequently Asked
             Reference Questions
          b) knowledge of reference floor locations:
                - Inter-Library Loan Office
                - indexes and abstracts
                - WLU catalogue on microfiche

2

- annual reports of companies
- Financial Post Cards
- atlases
- reference handouts
- University of Guelph catalogue on CD-ROM
- pamphlet file
- SIRLS material
- current newspapers (also: know which issues are on microfilm)
- language labs
- serials lists for other universities
- United Nations microcards and microcard reader
- UN fiche (cabinets and current file)
- online searching room (be aware that online services such as DIALOG are available)

c) familiarity with tools on Quick Reference shelves

2) To assist users with CD-ROMs.
Required knowledge:
- keyboard (eg. function keys, arrow keys)
- warm booting of computers
- subjects covered, print counterpart (if any)
- entering and exiting programs
- free text searching
- use of logical operators (AND, OR, NOT)
- meaning of abbreviations for field names (eg. AU)
- searching specific fields
- displaying records
- downloading records; how to obtain printouts
- use of thesaurus (if available)

ADDITIONAL AREAS OF RESPONSIBILITY (FOURTH FLOOR)

1) Answering directional questions for fourth floor.
Requires: knowledge of fourth floor locations:
- periodicals (catalogued and uncatalogued)
- government documents (know CODOC filing order)
- government debates, statutes, sessional papers
- census material
- microfiche cabinets, readers and reader/printers
- microfilm cabinets, readers and reader/printers
- UN fiche (cabinets and current file)
- OECD microfiche

2) Accessing materials on microform.
Requires: a) using microfiche readers and reader/printers
b) using microfilm readers and reader/printers
c) adding paper to printers
d) changing cartridges in printers

3

3) Locating serials in binding process or in storage.
Requires: a) knowledge of serials check-in cards
          b) location of bound volumes in catalogue processing
          c) use of request forms for items in storage

JOB PERFORMANCE

Basic Principles

1) Be friendly, courteous, non-judgmental, patient, and interested in the users' needs. Since many users feel shy or awkward about asking questions, be encouraging, reassuring, and tactful. Users may remember the attitude and behaviour of staff long after they have forgotten whether a specific information need was met.

2) Most users want their information needs met as quickly and efficiently as possible; therefore, save the user's time. HOWEVER:

3) Many users do not reveal their real information needs right away. For example, a user who asks for student newspapers may really want information on budget cuts; a user who requests a book about Schubert may really want the words to one of his songs. Therefore, take time to determine the real need before suggesting a specific source or research strategy. Taking a little extra time at the beginning of a search saves time in the long run.

4) Use primary sources (expert sources) whenever possible. For example, for questions about circulation policy, refer user to the Circulation Department. This saves the user's time and ensures the most up-to-date information.

5) Most users prefer to work with one staff member at a time. Let the user choose who they want to work with. Also, if a user is working with your back-up or another staff member, don't hover in the background; return to the desk or help the next user.

6) Be sure all users receive either some kind of information or a referral.

7) When appropriate, let patrons know that instruction is available: tours, classes.

Ethical Issues

1) All users should receive equal service, regardless of appearance, status, etc.

2) Do not attempt to interpret legal, medical, business, statistical, or any other information for the user.

4

3)   Respect the user's right to privacy regarding information sought and materials consulted.   Do not discuss needs of an individual or group of users, or of any transaction between users and staff members, outside of the professional context.

4)   The final choice of whether and how to use information rests with the user.

The Desk

1)   When a user approaches, put down your work, make eye contact, smile, ask if you can help.

2)   Help users in the order in which they arrive at the desk.   In-person queries have priority over telephone queries.

3)   If a line forms, acknowledge the people who are waiting. Example: "I'll be back to help you in a minute."

4)   Look approachable.   When doing your own work at the desk, choose activities easily interruptible and avoid piling the desk with large amounts of material. Also, keep personal conversations, with staff or users, to a minimum.

5)   Work on your assigned exercises and information questions while you are scheduled on the desk, not while you are scheduled to work at your regular position.

6)   If you are unable to work at your scheduled time, make arrangements to trade with someone else.   Inform your back-up or the head of reference of the change.

Reference Interview

1)   As the user presents the initial request, keep eye contact, nod to show understanding. Don't interrupt.

2)   Avoid making assumptions about users and their information needs. For example, just because someone looks like a student, don't assume that they are a student or that they are writing an essay.

3)   To elicit more information, use encouragers: "I see," "Yes," "Go on." Sometimes a short pause will encourage the user to say more.

4)   Try asking open-ended or neutral questions.   Pause after asking the question (don't try to second guess).   Try one of the following questions:
        How can I help you?
        What would you like to know about X?
        What else can you tell me about X?

5

Where have you looked so far?
Can you give me an example?
Could you tell me how you plan to use this information?
(Be tactful; don't give the appearance of prying.)

5)   Closed questions (that suggest a specific response) may be
useful later in the interview. Examples:
Do you want primarily Canadian information?
Do you need books, periodical articles, or both?

6)   To check your understanding of a comment, paraphrase it back
to the user. For example: "So you want to identify the Canadian
companies listed in Standard and Poor's?"

7)   Avoid library jargon whenever possible. For example, you need
not tell users about "boolean operators"; just explain how the word
"and" can help them find fewer, more pertinent items.

8)   Keep the conversation on track. For example, if the user
digresses, you might say, "That's very interesting. But tell me
about . . ."

9)   Communicating with international users who may be unfamiliar
with English or with our library policies requires extra tact and
patience.
a)   Speak slowly; don't raise your voice.
b)   Use straightforward vocabulary and sentence structure.
c)   Avoid slang, metaphor, jokes.
d)   Check often for comprehension. Try saying the same thing
several ways to check for understanding. Example:
"Do you want to borrow this? . . . to take it home?"
e)   Let the user know if you are having trouble understanding
their request; ask them to repeat it slowly. If you
still do not understand, ask them to write it down.

Answering Questions

1)   Show, or if you are on the phone tell, the user the source you
are using to find an answer.

2)   When time permits, and the situation is appropriate, show the
user how to use the tool. For example, describe how a title search
on QCAT is done. Instruction is most appropriate when the user is
looking for material for a paper, speech, or other project, or when
the user appears unfamiliar with a source and interested in
learning how to use it.

3)   If you move away from the desk to answer a question, for
example to check the Serials List, tell the user what you are
doing, and if possible, take them with you.

4)   Be aware that if you try too hard to match a question to the

6

sources you know, you may give inaccurate or inappropriate information. For example, PsycLIT may not be the best starting place for a user who wants articles in psychology. Let the user know that other sources are available. (See reasons for directing users to print indexes, p. 10.)

5) If user has been unable to find an item in the bock stacks:
   a) Try to determine if they have looked in the right place. You may need to explain stack arrangement.
   b) If user is still unsuccessful, ask back-up if they can accompany user to stacks. Or suggest that user contact circulation to trace the item.

6) If item is not at WLU:
   a) If user has made the search, recheck the catalogue while they look on.
   b) Ask if user would like to check the University of Waterloo catalogue.
   c) Suggest inter-library loan.
   d) Ask if another item on the topic would be helpful.

7) Handling complaints:
   a) Listen quietly. Don't attempt to contradict user or defend library policy.
   b) Give user time to describe complaint fully. (Many just need to blow off steam.)
   c) If their expectations are not clear, ask:
      "What would you like us to do?"
   c) Decide if situation is in your control. If not, refer.
   d) If an immediate referral is not possible, take user's name and number, or give name and number of contact person to user.

8) Record the questions you answer.

Follow-Ups

1) Whenever possible, check to see if the information you find meets the user's needs. Example: "Does this answer your question?"

2) When you give users directions to something within sight of the desk, watch to see if they find it successfully.

3) Encourage the user to return for further help. Example: "Come back if you don't find what you need."

4) If you get a user started on a search (for example on QCAT or a CD-ROM), and time permits, return to ask if the user is finding the desired information.

5) Walk past QCAT terminals and CD-ROMs occasionally; make

7

yourself available for questions. Also, keep alert for users at the quick reference shelves who may need help.

Phone Calls

1) Answer phone with the words: "Library Information Desk."

2) When phone rings and you are helping another user, take the caller's name and number. Tell the caller approximately when you expect to call back.

3) If your shift is ending and you have not had time to return a call, pass the information to your back-up.

4) If someone calls to ask if a particular item is actually on the shelf, explain that you cannot leave the desk to check the shelves.

5) If users call with a long list of citations to check, or if they seem to be starting a research project, encourage them to come to the library and work with a librarian.

6) When calling for information, identify yourself and your role: "This is Sally R. on the Information Desk . . ."

7) Avoid making calls not directly related to information desk business.

Referrals

1) If you have any doubt about whether you can answer a request correctly, completely or efficiently, refer it to your back-up, or if you work on fourth floor, to the third floor information desk. It is better to refer too many rather than too few questions.

2) If a line forms, and your back-up has not joined you at the desk, let your back-up know you need help.

3) Refer reference questions to your back-up, even if the questions fall into another reference librarian's subject area. Your back-up will make a further referral, if necessary.

4) Explain to the user that you are making a referral. Example: "Let me refer you to a librarian for further help."

5) If you have already checked one or more sources, tell your back-up where you have looked.

6) After you have referred a question, return to the desk rather than staying to hear the answer. (You can ask your back-up about the outcome later.)

8

7)   When a user asks a reference question and your back-up is busy, find another librarian who can help. If no librarians are available (for example, during a Library Council meeting), take down the user's name, number and information need; or, suggest the user return at a later time.

8)   If you are unable to satisfy a user's information need, always refer the question to your back-up.

9)   Do not worry if there are many questions you are unable to answer.   This is an "information" desk; you need not try to duplicate the expertise of other departments and staff members. Users should expect to be directed elsewhere. Your job is to screen requests: answer what you can and pass the rest along promptly.

DESCRIPTION OF TOOLS

Online Catalogue (QCAT)

     Records the books, periodicals and government documents owned by the library. May be accessed via terminals in library or from computers with modems (instruction cards available).

Some common misconceptions about QCAT:
    a) journal articles are included
    b) adding terms to a field will expand the search
    c) any subject term (eg. Inuit rather than Eskimos) will
       be understood by system
    d) government documents use same controlled subject headings
       as books
    e) answers all types of reference questions

CD-ROMs

     Computerized indexes for specific subject areas.   Let users know they should sign up to reserve the appropriate computer. You may encourage users to work out a search strategy ahead of time.

ABI/INFORM
     Indexes over 800 business, management and industry-specific journals. Coverage from about 1988.

CBCA (Canadian Business and Current Affairs)
     Corresponds to Canadian Business Index, Canadian News Index and Canadian Magazine Index. Coverage begins with 1982. For the most recent information, direct patrons to the Canadian Index (AI 3 C22).

ERIC
     Coverage begins with 1982.   Note: WLU owns very few ERIC

9

12

documents (numbers beginning ED in AN field).

MLA
Corresponds to <u>MLA International Bibliography</u> (articles, books, book chapters and dissertations in modern languages and literatures). Coverage begins with 1981. For 1921-1980, direct user to paper index: Z 7006 M64.

PsycLIT
Corresponds to <u>Psychological Abstracts</u>. Three separate discs: two for journals and one for books and book chapters. Journal coverage begins with 1972; book coverage with 1974. For 1927-1973, direct user to paper index: BF 1 P65.

Religion Index
Corresponds to <u>Religion Index One</u> (journal articles), and <u>Religion Index Two</u> (multi-author works). Coverage begins with 1975.

Sociofile
Corresponds to <u>Sociological Abstracts</u> (articles and dissertations). Coverage begins with 1974. Note: ignore AVA field: does not apply to WLU. For 1953-1973, direct user to print index: HM 1 S67.

SPORT
Articles, book chapters, microforms, theses and other publications. Coverage begins with 1975. Includes SIRLS documents, which are owned by WLU (located by SIRLS numbers).

United Nations Index
Corresponds to <u>UNDOC</u> (UN documents index). Coverage begins with 1984 (will eventually extend back to 1981). For 1979-80, direct user to print index: Z 6482 U45.

Although CD-ROMs provide efficient, flexible searching, keep in mind that a user may need to use paper indexes as well or instead of CD-ROMs. Some reasons to direct user to print indexes:
   a) computer is booked and user needs material right away
   b) user's topic is not covered by a CD-ROM
   c) user only needs one or two sources
   d) user needs the most recent business or news information
   e) user needs older information than found on the CD-ROM
   f) user needs further information than found on the CD-ROM
   g) citation contains an error (item cannot be found as listed)

Some common misconceptions about CD-ROMs:
   a) WLU holds all the items listed
   b) CD-ROMs give comprehensive coverage of subjects; no need to
      look elsewhere
   c) CD-ROMs are the only tools for finding journal articles
   d) CD-ROMs contain full texts of documents

10

e) all CD-ROMs contain books as well as journal articles
f) computer will "understand" what user wants; no need to formulate search
g) any of the CD-ROMs can be used for any search
h) the CD-ROM currently loaded at a particular work station is the one wanted (eg. confusing ERIC with Sociofile)
i) citations are right up to date and include the most recent publications

Quick Reference Tools

GENERAL

<u>Canada Year Book</u> HA 744 S81
- Compiles Statistics Canada information. Index at end.

QUICK REFERENCE INDEX

16

APPENDIX A

Reference Situations: An Exercise for Support Staff

Describe what step(s), if any, you would take to respond to the following situations. For example, describe an action you might take, a question you might ask, or a person or place you might refer the patron to. Feel free to describe more than one possible step. (Consider that a situation might have more than one possible meaning.)

Remember: there are no "right" or "wrong" answers, though some responses may be more helpful than others.

1) You are sitting and writing at the information desk when a patron slowly walks past and glances at you.

2) You have given a patron directions to the Financial Post Cards. The patron looks a little uncertain, but walks off in the right general direction.

3) A patron walks up to the desk and asks where the CD-ROMs are located.

4) A patron complains that a series of call numbers is missing in the stacks on the fifth floor.

5) A patron, who has found 300 items on a topic while searching PsycLIT, asks you how to download these items to a computer disc.

6) A patron asks for help using the bound issues of the MLA Bibliography (located in the reference stacks).

7) A patron approaches the desk and asks for help finding material on child abuse.

8) A patron asks for help doing a DIALOG search on CBCA.

9) Describe if or how your responses to these two situations would differ:
    (a) A patron walks up to the desk and says, "I work at Physical Plant and I've never used the library before. Can you find the latest Lemon-Aid for me?"
    (b) A patron walks up to the desk and says, "I'm writing an essay on the used car business. Do you have the latest Lemon-Aid?"

10) A patron asks for a particular book. You discover the WLU does not own this item.

11) A patron is searching for the topic "motor development" on SPORT and has found 700 items. The patron asks if it is necessary to look at all of these records to find the best ones for a paper.

17

12) A patron asks for help finding journal articles for a geography assignment.

13) You have helped a patron get started searching for a topic on a CD-ROM. A few minutes later, you pass by and notice that the patron is now searching for a new topic.

14) A patron asks where the books on the United Nations are kept.

15) A patron asks for a phone number for a federal government department. You check all the ready reference sources you are familiar with, but cannot find the answer.

16) A patron asks if you know the lending period for books borrowed from the Waterloo Public Library. (You are familiar with this library's policies because you sometimes borrow from there yourself.)

17) A patron is searching PsycLIT for the term "mannerisms" and has only found 19 items, not all of which have much to do with the topic. What advice can you offer?

18

APPENDIX B

Training Questions

Using the online catalogue, quick reference sources, Library
Handbook, and other tools located in or near the information desk,
answer the following questions, indicating where or how you find
your answers. Be specific; provide enough information so that
someone else could duplicate your actions.

1)   Does the library have a book by Grinspun on free trade?

2)   What is the extension for the Acquisitions Department?

3)   What is the address of the University of the Philippines?

4)   Does the library have the <u>Journal of Historical Geography</u>?

5)   Which years of the <u>Statistical Yearbook</u> does the library have
in book form?

6)   Does the library have a Kompass directory for Australia?

7)   When is the Reserve desk staffed on Sundays?

8)   Does the library have a calendar for the University of Reading
in England?

9)   Which CD-ROM gives information on IBM?

10)   What is the telephone number of the Newfoundland Psychiatric
Association?

11)   Does the library have any recordings of Beethoven's Eroica
Symphony on compact disc?

12)   What is the phone number for the Ministry of Community and
Social Services for Ontario?

13)   What is the postal code for Norwich, Ontario?

14)   Where are annual reports of companies kept?

15)   Where are concordances to the Bible?

16)   Does the library have a phone book for Orlando, Florida?

17)   What is the FAX number for Microtronix Systems in London,
Ontario?

18)   Can you explain why the 1980 issues of <u>Canadian Dimension</u> are
not on the periodical shelves on the 4th floor?

19

19) Does the library have a social work thesis by McCarthy?

20) Where are the Russian-English dictionaries?

21) When was the present Canadian flag adopted?

22) What is the zip code for Mitchell Ave. in Oakland, California?

23) Does the University of Waterloo have Communication Abstracts?

24) Who won the World Series in 1980?

25) Are there any statistics on trade schools in Canada--specifically on employment of graduates?

26) What does the periodical abbreviation Chr C stand for?

27) Who is the representative for Alaska in the U.S. House of Representatives?

28) On the CD-ROM Sociofile, the AVA field reads: "Hard copy reproduction not available." Does this mean this item is not available at WLU?

29) Where can I find reviews of Possession by A.S. Byatt?

30) Who is the Consul representing New Zealand in Canada?

31) Are the August 1991 issues of the Kitchener Waterloo Record on paper or microfilm?

32) What do the initials KBC stand for?

33) How can I find some biographical information on Alan Stubbs Trueblood?

34) Who is the member of the House of Commons for the Yukon?
